# IMitate

*Practice medicine before you practice medicine.*

**A fast-paced, diagnostic reasoning simulator for internal medicine and primary care training.**

2025

# Introduction

## The Problem

- Students lack realistic **clinical reasoning** practice
- Paper cases are **passive**; OSCEs are **expensive** & rare **($400–$1,000/student)**
- **Internal medicine** is especially **hard**: vague symptoms, overlapping conditions
- Result: students enter clerkship **unprepared** for **real patient encounters**

# Introduction

## The Opportunity

- Growing demand for **accessible diagnostic training**
- Current tools don’t scale; infrastructure-heavy
- A browser-based simulation platform can fill this gap
- Needs: realism, feedback, flexibility

# The Product

## How it Works

- Web-based simulator, voice/text interaction with virtual patients
- Timed clinical scenarios (~5–10 mins)
- Steps: ask questions → submit diagnosis/plan → get instant feedback
- No install needed — runs entirely in-browser

# The Product

## Scoring & Features

- Timed cases, score **out of 50** with penalties over 5 mins
- Criteria: diagnosis, OLDCARTS, reasoning, timing
- Tech stack: Gemini AI, FastAPI, SQLite, Canva UI, Supabase, NextJS, Tailwind
- History tab for **review**, monthly leaderboard for **competition**

# Use & Audience

## Applications

- For: premeds, med students, internal medicine residents, educators
- Used in: flipped classrooms, residency onboarding, bootcamps, peer competitions
- Also works for independent/self-directed learners

# Use & Audience

## User Potential

- ~**200** med schools in North America
- **100,000+** med students (pre-clerkship + clerkship)
- **30,000+** residents yearly, many in IM/PC
- Also serves informal groups, exam prep, and progress benchmarking

# Business & Growth

## Hybrid Revenue Model

| Subscription | Price | User Limit |
|---|---|---|
| Individual Access | $40 /year<br>5$/month | 1 |
| Institutional License 1 | $3,000/year | 50 |
| Institutional License 2 | $7,500/year | 150 |
| Institutional License 3 | $15,000/year | Unlimited |

# Business & Growth

## Market & Expansion

- Global med sim market: **$2.4B+**, North America: **$1.1B–$1.3B**
- Goal: **20–30** institutions, **500–1,000** independent users = **$200K–$325K** in Y1
- Fall 2025 beta → specialty modules, EMR-style docs, referrals, dashboards
- Agile development, low technical risk, scalable
